# Welcome!

I would like to welcome you to our 11th annual bull sale, and thank you for taking time to look at our offering! I have to start out by thanking all of my family. My wife, Kami, and our 2 daughters Kyra and Kasey, all play a huge part in our operation and we could not get done what we do without the tremendous amount of work they all put into it. We also have to thank our parents for all the work and time they spend helping out. Whether it be feeding cattle or helping out on the farm or running kids here and there, all of their help is greatly appreciated! Finally, we have to thank Shane for all his hard work. His dedication and help with the cattle and farming operation is a tremendous asset to us.

The bull's being offered this year are a tremendous set of stout, high performing, easy doing bulls. Our bulls are fed right and built for longevity. Feet and legs are extremely important to us and our bulls are fed a high roughage diet with the idea of lasting longer and being problem free for a longer period. A larger number of the bulls selling will have 50k data collected on them and will be posted in the catalog. We hope this gives our customer more confidence, and aids in the selection of their bull. We take great pride in the bulls we offer you and only offer the top 1/3 of our bull crop born. This ensures our customers are getting the best bulls for their money and not just a "average" bull! The lot 1 bull may very be the best bull to ever sell through our sale, and that includes the Semex sire 4M Element 405 selling through this sale 3 years ago! He is extremely massive in his top and hind quarter, but yet is very smooth through that front 1/3. He is the current #1 WW, YW, and CW non-parent son of Musgrave Aviator in the entire breed. He puts all his tremendous growth and power together in a package with more moderate milk and birth weight than most.

This year we will also be offering a group of select females to share with you. We are truly offering the best of what we have as far as our replacement females go! Many of these were the highest ratioing females in our herd this year. There will be 2 daughters of our cornerstone donor, 2004, being offered. These will be future donors for whomever is lucky enough to take them home, and that is why we are reserving 1 flush on each of those daughters. There will also be a full sister to our high selling female last year whom is also a daughter of 2004 by Element that will sell, as well as a female that would lead off the majority of sales anywhere, 4M Blackbird 2014. She is our only full sister to 2004 and one of the very few daughters of 4301 to sell anywhere!! These females are all truly one's to build a herd around and if you look at their phenotype, numbers, and pedigrees, you'll see why I am excited to offer these.

I want to again thank Hans and his family for once again being a part of our sale and bringing us a tremendous set of bulls. The Burken families are as good of people as you will find anywhere and we thank them again for bringing us a tremendous set of Sim influenced bulls. Our sale will begin at 2:00 on Sunday, March 11th and we will serve a complimentary lunch beginning at 12:00. If you should have any questions on any of the bulls, please feel free to contact Hans or I. Our place is always open for visitors and we hope to see you the 11th.

*Sincerely, Brandon Meyer*

**BURKEN CATTLE CO | 1987 Road 1800 | Blue Hill, NE 68930**  
 Hans Burken 402-469-1966 | hansburken@gmail.com

**BURKENCATTLE.COM**

Welcome to the 2018 4M Angus/Burken Cattle Bull Sale. First off, I want to thank Brandon, Kami, and the girls for the opportunity to market our bulls with them. It has been a pleasure to showcase our genetics alongside this great set of Angus cattle each year. I would also like to thank all the friends and family behind the scenes that help out through the year to make this offering available.

My family and I are very pleased and excited to offer this set of bulls to the public. We feel this is the deepest set of bulls from top to bottom with every bull carrying significant profit potential. The direction of our breeding program over the years to produce problem-free, efficient beef cattle has not changed. Whether this is more calving ease, carcass, growth, or maternal traits, our goal is to have balance to broaden your marketing potential.

I would also like to thank Mitch Ziebell, Scott Nielsen, and the guys with Darr Feedlot for developing the bulls. They do an exceptional job of developing the bulls for future longevity and are a pleasure to work with. We stand behind these bulls 100%, if there is ever any problems, feel free to contact myself or any of my brothers.

*Sincerely, Hans Burken*

**THE SALE WILL BE HELD AT THE 4M ANGUS SALE BARN**  
 LOCATED 1 MILE NORTH AND 1½ MILES WEST OF BLUE HILL, NE

**BURKEN CATTLE CO**

**SUNDAY

## REPRESENTATIVES

**Drew Feller**, American Angus Association.....402-841-4215  
**Randy Rasby**, Livestock Plus .....308-539-6195  
**Dallas Woltemath**, Marketing Consultant.....308-390-6400

## LUNCH

A complimentary lunch will be served starting at 12:00 noon Sunday, March 11, 2018.

## FREE CARE

All bulls will be cared for and wintered free of charge until March 30. Any bull picked up within 3 days of the sale will have \$50 deducted from the purchase price.

## LIABILITY

All precautions will be taken to protect the safety of everyone attending the sale. However all persons attending the sale do so at their own risk. Neither 4M Angus nor any of the sale staff assume any responsibility or liability, legal, or otherwise for any accidents occurring on or about the premises.

## ONLINE BIDDING

The sale will be broadcast live on DVAuction.com and videos will be available on their website as well. Please register a few days in advance of the sale. Call the office at 402-316-5460 with questions.

## GUARANTEE

All bulls selling for \$2,500 or more are guaranteed against breeding injury for the first season. Breeding season is defined as the 90-day period following the turnout of the bulls. If a replacement bull is available, one will be provided or if the buyer prefers, credit towards one bull will be given in the following year's sale, less salvage value of the injured bull. This guarantee is not a life insurance policy. It does not include loss due to abuse, neglect, sickness, or an act of God (lightning, flood, etc.). If any problems or issues arrive, please contact us within 48 hours.

## TERMS AND CONDITIONS

All cattle sell under a 100% satisfaction guarantee from 4M Angus and under the terms and conditions of the American Angus Association.

## HERD HEALTH

The bulls are on a complete health program. They have had pre-weaning and weaning shots and have been vaccinated with IBR, BVD Type I and II, P13, Pasturella, 7-way, Haemophilus, and Decotmax injectable. All bulls have been scrotal measured and have passed a semen test done by Dr. Jeremy VanBoening of Republican Valley Animal Center at Alma, NE.

## FREE DELIVERY

Free delivery will be done on all bulls up to 150 miles. After the 150 miles you may be asked to meet at a central location or arrange for delivery of your bull.

# ANGUS

THE BUSINESS BREED

**Expected Progeny Difference (EPD)**, is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

**\$Value Indexes**, are multi-trait selection indexes, expressed in dollars per head, to assist beef producers by adding simplicity to genetic selection decisions. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

**Calving Ease Direct (CED)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

**Birth Weight EPD (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight EPD (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**Yearling Weight EPD (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**Maternal Milk EPD (Milk)**, is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

**Cow Energy Value (\$EN)**, expressed in dollar savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

**Carcass Weight EPD (CW)**, expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

**Marbling EPD (Marb)**, expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

**Ribeye Area EPD (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

**Fat Thickness EPD (Fat)**, expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

**Weaned Calf Value (\$W)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk and mature cow size.

**Feedlot Value (\$F)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

**Grid Value (\$G)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

**Beef Value (\$B)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

## WHY WE TEST WITH i50K FROM ZOETIS

Powered by i50K™ from Zoetis, our cattle sell with genomic-enhanced expected progeny differences (GE-EPDs).

With GE-EPDs, we're proud that customers like you can minimize risk in their investment — and add predictability and dependability to your cattle.

The benefits of buying i50K-tested bulls and heifers goes much farther than this, however. You'll know early on what that animal is likely to transmit to its offspring and potential for performance in the feedlot and on the rail. And, you can verify the sire of calves and replacement heifers produced by the bulls you buy from us — through GeneMax® Advantage™ and GeneMax® Focus™ — to make better breeding and management decisions down the road.

Knowing an animal's potential. Continuous progress of your herd. That's why we test with i50K.

For more information:

Number of progeny records in conventional genetic evaluation needed to achieve the same accuracy as GE-EPDs powered by i50K

Trait	Progeny Equivalents
Heifer Pregnancy (HP)	22
Calving Ease Direct (CED)	24
Birth Weight (BW)	13
Milk	14
Docility (Doc)	11
Scrotal Circumference (SC)	16
Weaning Weight (WW)	19
Yearling Weight (YW)	24
Dry Matter Intake (RADG)	17
Yearling Height (YH)	12
Mature Weight (MW)	16
Carcass Weight (CW)	7
Marbling (Marb)	8
Ribeye Area (RE)	11
Fat Thickness (Fat)	12

**Expected Progeny Difference (EPD)**, EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing what units they are expressed

in. For example, if the above case referred to weaning weight EPDs, A would be expected to sire 15-pounds more weaning weight than B. If calving ease were the trait, A would be expected to sire 15-percent more unassisted births in first-calf heifers; in other words, if B sired 30 assists in a group of 100 heifers, we'd expect A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit [www.simmental.org](http://www.simmental.org). Listed below are the units ASA EPDs are expressed in:

**Calving Ease (CE)**: Percent of unassisted births when used on heifers.  
**Birth Weight (BW)**: Pounds of birth weight.  
**Weaning Weight (WW)**: Pounds of weaning weight.  
**Yearling Weight (YW)**: Pounds of yearling weight.  
**Maternal Calving Ease (MCE)**: Percent of unassisted births in first-calving daughters.  
**Milk (MLK)**: Pounds of weaning weight due to milk.  
**Maternal Weaning Weight (MWW)**: Pounds of weaning weight due to milk and growth.

**Yield Grade (YG)**: Yield grade score.  
**Carcass Weight (CW)**: Pounds of carcass weight.  
**Marbling (MRB)**: Marbling score. Back Fat (BF): Inches of backfat.  
**Ribeye Area (REA)**: Square inches of ribeye.  
**All-Purpose Index (API)**: Dollars per cow exposed under an all-purpose-sire scenario. (See below for more details.)  
**Terminal Index (TI)**: Dollars per cow exposed under a terminal-sire scenario (See below for more details.)

**\$Indexes**: Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ indexes come in. Through well conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on your bottom line. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

- **All-Purpose Index (API)**: Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.
- **Terminal Index (TI)**: Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield.

**Using API and TI**: First, determine which index to use; if you're keeping replacements use API, if not, TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years ( $\$50 \text{ diff.} \times 30 \text{ hd.} \times 4 \text{ yr.} = \$6,000$ ). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit [www.simmental.org](http://www.simmental.org).

One of the top bulls we've ever offered is this Aviator son. He is a massive topped, thick quartered, sound individual with a ton of performance and growth potential. As of writing this, he is the #1 WW, YW, and CW non-parent Aviator son in the entire Angus breed. He is in the top 1% for WW, YW, CW, \$F, and \$W and top 2% for \$B. Ratioed 106 at weaning, 109 at a year with a adj. 365 of 1501, and had a 16.9 actual ribeye to ratio 115 with a 43cm scrotal. A truly unique individual with loads of potential! Retaining 1/3 semen interest.

The first of 2 sons out of hands down, the best cow to ever walk our place, 4M Blackbird 2004. This bull's maternal brother sold in our 2015 sale to Peak Dot Ranches for \$35,000 and was immediately leased to Semex and his sister was last year's high selling female at \$18,000 to Poss Angus. With a epd spread of 2.2 to 91 to 152, this bull will be a tremendous asset to anyone's herd! Ranks in the top 1% of the breed for WW, YW, CW, RE, \$W, \$F, and \$B.

One of the many bulls in this sale owned by my daughters. The dam of this bull is also the dam of the flush mates selling as lots 15-19. She has produced our top selling bull in 2 previous sales and is one of our top producing donors. Her natural calf by Fortress will add more length and growth to his calves.

Another large scrotated individual to lead of our 1682 sons. These bulls have a ton of middle shape and depth of body too them with that soft look. The dam of this bull is one of my favorites and recently entered our donor lineup. She has 5@105 at weaning and 4@102 for a year and has produced 2 of our top selling bulls selling to Aaron Herz.

This set of flush mates are out of the same dam of lot 12. They are big middle, soft made, individuals out of one of the hottest sires in the breed, 1682. These bulls will add body and softness to their cattle, all while keeping frame size under control. Truly a great opportunity to add a set of full brothers to your herd! Flushmate to lots 16, 17, 18, and 19.

Flushmate to lots 15, 16, 17, and 18.

## The Females at 4m Angus...

...range from the top carcass and growth in the breed, to daughters from many national show champions. The goal of 4M Angus is to raise balanced females from the most dominant cow families in the Angus breed. 4M females have all the qualities necessary to produce a profitable calf.

The first of a trio of bulls by PA Valor. Valor died at a young age and semen was very limited and hard to get unfortunately. They are high performance, good doing cattle and if you sell your calves by the pound, these bulls are for you. The dam of this bull also produced the top selling bull in a past sale selling to Carlson Cattle Company for \$13,000. This bull may be her best one yet and is one of my favorites in the sale! Ratioed a remarkable 162 for IMF!

Fall bull out of our 904 donor cow. Maternal sib to lot 54. Very deep and thick bull. His mother always makes a standout.

# Angus Females

The females we are offering this year are without question the greatest set to ever sell for us. The replacement females are the absolute top end of our herd. We selected the best of the best from a few different sire groups to offer you. They range from elite growth and carcass EPD's to some of the most maternal made females we have produced. We feel there are absolute donors in the making that we have selected and couldn't be more excited by the quality. The past few years we have tried to offer a couple elite cows and this year we may have selected two of the top individuals to ever leave our farm. Whether you are looking for your next brood cow, bull maker, or elite donor, we feel our females will do a tremendous job for anyone, anywhere!

We lead off our female part of the sale with 2 individuals that are some of the top individuals we have ever raised! Out of the great Blackbird 2004 cow who has produced our top selling all time bull, 4M Element 405 selling for \$35,000 to Peak Dot Ranches and leased to Semex and 4M Blackbird 4058, our top selling female last year at \$18,000 selling to Poss Angus. This daughter of Rampage is in the top 1% of the breed for WW, YW, CW, RE, \$W, \$F, and \$B. Starting with a double digit CED and going all the way to 159 for her YW EPD, this female truly has no holes. We are retaining 1 future flush at our expense and the buyer's convenience on this tremendous individual.

Here is the one and only full sister we own to our great 2004 cow. This female, like her flush mate, just hits you with the sheer power and mass. Don't miss out on a tremendous opportunity to own a direct daughter of 4301 and a maternal sibling to some of the greatest cows in the breed. Her 3/4 sister Sandpoint Blackbird 8809 needs no introduction and is one of the top income producing cows in the breed and has numerous sires in stud across America. Another full sibling, Galaxy Blackbird 2102 is one of the elite donors at Montana Ranch. Ultra sounded safe to calve March 30th to 4M Fortitude 405.
